(54) Title: CHAIR LIFT

(57) Abstract

A chair for moving a non-ambulatory user having a first wheeled frame (26, 28) and a movable second frame (18) that raises and lowers with respect to the frame. A seat (50) is releasably secured to the second frame so that the seat raises and lowers in combination with the second frame. The chair may have pivotable large wheels (132) secured thereto to provide easier movement across a surface.
